

CURRICULUM VITAE

DZENE Liva

Institut de Science des Matériaux de Mulhouse – IS2M
3 rue Alfred Werner
68093 Mulhouse Cedex
Tel : +33.(0)3. 89.33.67.38
e-mail: liva.dzene@uha.fr

ACADEMIC QUALIFICATIONS

- Doctorate Degree in Earth Sciences, University of Poitiers, France (*September 2016*)
Thesis Title: “*Influence of particle size and crystal chemistry on cation exchange properties of swelling clay minerals*”
- MSc in Chemistry, University of Ottawa, Canada (*February 2014*)
- Master Degree in Earth Sciences, University of Poitiers, France (*September 2013*)
- BSc in Chemical Engineering, Riga Technical University, Latvia (*June 2011*)

PROFESSIONAL EXPERIENCE

2017 – present	<u>Assistant Professor</u> École Nationale Supérieure de Chimie de Mulhouse Institut de Science des Matériaux de Mulhouse (France) Courses: Inorganic Chemistry, Instrumentation, Analytical Chemistry. Main research areas: clay mineral synthesis and characterization for application in catalysis.
2017	<u>Postdoctoral Researcher</u> Institut de Science des Matériaux de Mulhouse (France) Main activities: Synthesis and characterization of iron-rich phyllosilicates in the context of long-live radioactive waste repository.
2013-2016	<u>Doctorate Thesis</u> Institut de Chimie des Milieux et Matériaux de Poitiers (France) Main activities: The research project investigated the role played by particle size and crystal-chemistry on the exchange and fixation of cesium and strontium on swelling clay minerals. It included experimental sorption isotherms and associated thermodynamic modelling on size-selected clay fractions and on synthetic samples. Complementary structural information was obtained by means of X-ray diffraction and molecular simulations. (Supervisors: Dr. Eric Ferrage, Prof. Emmanuel Tertre and Dr. Fabien Hubert)

2013	<p><u>Master Thesis</u></p> <p>Centre for Catalysis Research and Innovation (Canada)</p> <p>Main activities: A biodegradable polymer-clay nanocomposite synthesis was performed optimizing various synthesis parameters followed by a characterization of the composite materials structure (XRD, TEM, NMR) and thermal properties (TGA). (Supervisors: Prof. Christian Detellier and Dr. Rola Mansa)</p>
2012	<p><u>Research Internship</u></p> <p>GeoBioTec, University of Aveiro (Portugal)</p> <p>Main activities: The project included a fieldtrip to Porto Santo Island, then further laboratory experiments of clay mineral extraction and their chemical (XRF), mineralogical (XRD) and mechanical (abrasion, plasticity) characterization. (Supervisors: Prof. Fernando Rocha and Dr. Ana QUINTELA)</p>

AWARDS AND HONORS

- Best presentation: 3rd place for oral presentation at the Clay Minerals Society's Annual Meeting in Atlanta, USA (2016)
- Student Travel Grant: Clay Mineral Society's Student Travel Grant to attend Euroclay conference / 52nd CMS Annual Meeting at Edinburgh, Scotland (2015)
- European Commission Scholarship of Erasmus Mundus for International Master of Advanced Clay Science (2011 - 2013)
- Kristaps Morbergs scholarship (2009 - 2010)

RESEARCH INTERESTS

1. **Synthesis of lamellar silicates for application in catalysis and composite materials:** hydrothermal synthesis, hybrid organic-inorganic layered compound synthesis and polymer-clay composite synthesis.
2. **Characterization of layered minerals:** structure analysis by X-ray diffraction coupled with adsorption experiments to investigate the reactivity of different surfaces.

PROFESSIONAL ACTIVITIES

Reviewer for international journals: Environmental Science & Technology, Chemistry Letters, Minerals, Applied Geochemistry, Comptes Rendus de Chimie, Chemosphere

Organization of conferences

- Scientific committee and chairman of session "Modification and synthesis of clays" of 9th Mid-European Clay Conference, 17-21 September 2018, Zagreb, Croatia.
- Chairman of 2nd International and Interdisciplinary Symposium „Clays and Ceramics”, 29-31 January 2018, Riga, Latvia.
- Scientific committee of 1st International and Interdisciplinary Symposium „Clays and Ceramics”, 28-29 January 2016, Riga, Latvia.

- Organization committee of the seminar “Clays and their characterization”, 1-2 February 2016, Riga, Latvia.

Scientific Societies

- French Delegate in European Young Chemist Network 2020-2022.
- Member of the Board of Directors of French Clay Group since 2019.
- Board member of Latvian Clay Scientific Society since 2015.
- Member of Clay Mineral Society since 2013.
- Chair of regional section Alsace of Réseau-Jeunes de Société Chimique de France 2018-2020.

STUDENT SUPERVISION

PhD

1. Laura CIPRIANO-CRAPINA (2019 - ongoing) – Subject: Synthesis of catalysts based on iron-rich hybrid talc-like lamellar materials for application in advanced oxidation processes

Master Internships

4. Sebastian MEYER (2019, 6 months) – Subject: Characterization of synthetic clay minerals for the study of their acid properties
3. Hugo CASSES (2019, 6 months) – Subject: Characterization of cement-based material in the context of long-live radioactive waste repository
2. Axel CAPITAINE (2018, 4 months) – Subject: Synthesis of saponites for the study of their acid properties
1. Héloïse VERRON (2015, 4 months) – Subject: Influence of the layer charge on the cesium desorption from saponites

SCIENTIFIC PRODUCTION

• **Articles in Peer-reviewed journals**

8. **Dzene, L.**; Brendlé, J., Limousy, L., Dutournié, P., Martin, C., Michau, N. (2018) Synthesis of iron-rich tri-octahedral clay minerals: A review. *Applied Clay Science*, **166**, 276-287.
7. **Dzene, L.**; Verron, H.; Delville A.; Michot L. J.; Robert J.-L.; Tertre E.; Hubert, F.; Ferrage, E. (2017) Influence of tetrahedral layer charge on the fixation of cesium in synthetic smectite. *Journal of Physical Chemistry C*, **121** (42), 23422-23435.
6. Jurgelane I., Sevjakova V., **Dzene L.** (2017) Influence on illitic clay addition on the stability of sunflower oil in water emulsion. *Colloids and Surfaces A: Physicochemical and Engineering Aspects*, **529**, 178-184.

5. **Dzene, L.**; Ferrage, E.; Viennet J.-C., Tertre, E.; Hubert, F. (2017) Crystal structure control of aluminized clay minerals on the mobility of caesium in contaminated soil environments. *Scientific Reports*, **7**; 43187.
4. **Dzene, L.**; Ferrage, E.; Hubert, F.; Delville A.; Tertre, E. (2016) Experimental evidence of the contrasting reactivity of external vs. interlayer adsorption sites on swelling clay minerals: the case of Sr²⁺-for-Ca²⁺ exchange in vermiculite. *Applied Clay Science*, **132-133**, 205-215.
3. Viennet J.-C.; Hubert F.; Tertre E.; Robin V.; **Dzene L.**; Ferrage E.; Turpault M.-P. (2016) Effect of particle size on the dissolution and aluminization processes of K vermiculite. *Geochimica et Cosmochimica Acta*, **180**, 164-176.
2. Mansa R.; **Dzene L.**; Rocha F.; Quintela A.; Detellier C. (2016) Preparation and Characterization of Novel Clay/Scleroglucan Nanocomposites. *Applied Clay Science*, **126**, 235-244.
1. **Dzene, L.**; Tertre, E.; Hubert, F.; Ferrage, E. (2015) Nature of the sites involved in the process of cesium desorption from vermiculite. *Journal of Colloid and Interface Science*, **455**, 254–260.

- **Other articles**

Dzene L.; Jeguirim M.; Brendle J.; Limousy L. (2019) Foreword of Second international symposium Clays and ceramics for environmental applications. *Comptes Rendus Chimie*, **22**, 103-104.

Barbane I.; Sedmale G.; **Dzene L.** (2011) Research of Dolomite – Clay Mixtures for Development of Roman Cement. Scientific *Journal of Riga Technical University*. Series 1. “Materials Science and Applied Chemistry”, **24**, 35-38.

- **Conference Communications**

Oral communications (international):

10. Boumaiza H., **Dzene L.**, Brendlé, J., Limousy, L., Dutournié, P., Martin, C., Michau, N. Synthesis of iron rich clays in the Fe/Si system using statistical experimental design. Euroclay 2019, Paris, France (1-5 July 2019).
9. **Dzene L.**, Brendlé, J.; Limousy, L.; Dutournié, P.; Martin, C.; Michau, N. Formation of iron-rich phyllosilicates in Si-Fe system in function of Fe/Si molar ratio. 9th Mid-European Clay Conference, Zagreb, Croatia (17-21 September 2018).
8. **Dzene L.**, Verron H., Delville A., Michot L. J., Robert J.-L., Tertre E., Hubert, F., Ferrage, E. Synthetic clays for study of complex soil phenomena: case of caesium desorption process. 2nd International, Interdisciplinary Symposium “Clays and Ceramics”, Riga, Latvia (29-31 January 2018).
